CAREER OBJECTIVE

To pursue a challenging career and be part of a progressive organization that gives scope to enhance my knowledge and skills also where I can use my technical skills to accomplish organizational goals with sheer determination, dedication, and hard work.

PROFESSIONAL EXPERIENCE

Software Engineer, Larsen and Toubro Infotech, Pune May 2018-Present

- Experienced in developing web Application from scratch using spring MVC framework.
- Experience in using MAVEN as build tools for managing dependencies.
- Developing new functionalities and adding new components to existing systems as well as fixing defects.
- Strong experience with API of Azure DevOps, TFS, JIRA, ALM.
- Excellent industry experience developing portable web-based user interfaces using the AJAX, JavaScript, JSP, jQuery and CSS.
- Working with clients to establish requirements, determine priorities and provide estimated development time.
- Strong experience with XML, JSON, Excel.
- Experienced in working with version control systems like SVN and GIT.
- Analyzed and designed program changes.
- Supported programming changes during quality assurance, user acceptance testing, and post implementation.
- Experience with defect management systems like Jira, Quality Center (ALM), TFS.
- Excellent communication skills and a strong desire to develop high - quality software.

KEY SKILL

- **Programming:** Java 8.
- **Database:** Apache Lucene, SQL Server, MySQL, Hibernate (ORM Tool)
- **Framework:** - Spring MVC, Spring Boot, Angular 8.
- **Build Automation Tool:** Maven.
- **Web development:** HTML, CSS, JavaScript, jQuery, Ajax, JSP.
- **Server:** Apache Tomcat, JBoss server.
- **Webservice:** RESTful.
- **Project and Issue Tracking:** JIRA, AZURE/TFS, ALM
- Adept at data structures, problem solving, end-to-end coding.
- Understanding of **NLP, Sentence Similarity, Topic modelling, K-means, Document Classification, Clustering techniques.**
- Excellent team worker with strong coaching and mentoring skills.

PROJECTS

LTI Glassbox

Description: - Glassbox is proprietary solution by LTI for predictive defect analysis. Glassbox is NLP driven tool which helps in analyzing historical data to deliver smart data insights into the impacted areas of defect for improved test management, improved code Quality. Glassbox uses various ML algorithms to give you detailed insights of you defect, test case data. Which can help to analyze the data of any tools like ALM, VSTS, JIRA, EXCEL and provide various analysis like reassignment of defects, defect aging, defect Hotspot, defect reopen, solution advisor for new defect for easy and early defect resolution.

Technology used: - Java, Spring MVC, Hibernate, MYSQL, JSP, Apache LUCENE, JavaScript, Ajax, HTML, Bootstrap, CSS, jQuery, NLP, Maven.

Tool used: - HeidiSQL, MySQL server, Eclipse, SVN.

Server used: - Apache Tomcat, JBoss.

Responsibility: -

- Worked as a product owner.
- Understanding and Analyzing the requirements from Clients.
- Design and Development of code.
- Fixing of Defects.
- Unit testing
- Production deployment.

Team Size: 2

LTI Canvas

Description: - LTI Canvas Insights is a platform that empowers the Software Development Life Cycle (SDLC) with AI and Correlation Algorithms. Using these two enablers, LTI Canvas Insights can help identify application hotspots, predict defects & risks, eliminate bottlenecks in defect & problem triage, unclog CI/ CD pipelines, and provide insights into application performance. This AI-infused, DevOps and Agile enabled way of delivering software has helped our clients meet high quality standards and speed-to-market. <https://www.lintinfotech.com/lti-canvas-insights/>

Technology used: - Java, Spring MVC, Hibernate, MYSQL, Apache LUCENE, Angular 8, HTML. Bootstrap, CSS, jQuery, NLP, Maven.

Tool used: - HeidiSQL, MySQL server, Eclipse, SVN, Visual studio code.

Server used: - Apache Tomcat, JBoss.

Responsibility: -

- Worked as a product owner for data analytics design and implementation part.
- Understanding and Analyzing the requirements from Clients.
- Design and Development of code.
- Fixing of Defects.
- Unit testing
- Production deployment.

Team Size: - 6

My Portfolio

Description: - I have created my own portfolio. Idea is about to create a profile where I will showcase my projects, my blogs etc.

URL: <https://rajeshprofile.netlify.app/>

Technology/Tool Used: - HTML, BOOTSRAP, CSS, JavaScript, GIT.
